*we change our menu with the seasons, using british
& european produce when it's at it's best! here are a
couple of things we're enjoying right now...*

*1) rainbow chard, a type of swiss chard that's a mix
of different coloured varieties, it has large leaves and
colorful stalks, and is similar to a beet but without
the root.*

*2) chanterelles, wild mushrooms that are
funnel-shaped, have wavy caps, and have a
distinctive taste that is often described as mildly
peppery.*

-

*our focaccia is made on site, proved for at least 24
hours for a deeper more complex flavour, and then
fed with extra virgin olive oil before baking.*

-

*sausages & chipolatas made in partnership with
PERRYS_E1*

-

*british, free range meat from h.g. walter
seasonal fruit & veg from nature's choice
day boat fish from woods fish
burger buns from rinkoffs*
